FRONT-END ENGINEER

FRONT-END ENGINEERING | UI/UX DEVELOPMENT & ENHANCEMENT | SAAS | ENTERPRISE SOLUTIONS

Front-End Engineer with career track record of success leading the design and deployment of high-impact web/mobile solutions for diverse users and enterprise clients. Leverage technical and analytical skills to support full-scope application development, working in collaboration with clients, executive teams and key stakeholders on user requirements, bug identification and reporting and the enhancement of the user experience (UX). Advanced technical acumen with strengths in leveraging various languages, platforms and frameworks to complete full-stack development for front-end features. Skilled at supporting junior engineers through mentoring and coaching to ensure optimal performance.

Areas of Excellence

Front-End Engineering • Testing & Debugging • Enterprise & SaaS Solutions • Mobile/Web Application Development
AWS Technologies • Cloud Infrastructure • Machine Learning Operations (MLOps) • Agile Development
Enterprise Proof of Concept (POC) • UI/UX Enhancement • Full Stack Development • Unit & Integration Testing

PROFESSIONAL EXPERIENCE

PAPERSPACE, Brooklyn, NY

2019 – 2021

Front-End Engineer – Notebooks

Partnered with cross-functional teams on the design and implementation of Machine Learning products for enterprise clients and community users. Led the design and optimization of user interfaces (UI) and front-end development for Community Notebooks product with 400K+ users. Collaborated with engineering resources and provided support through code reviews, technical planning and high-priority bug resolution. Worked extensively with product managers and executive leadership team on user requirements for the design, build and deployment of software solutions.

- Built GUI and CLI interfaces for Machine Learning model deployments, resulting in a \$250K+ enterprise contract; developed Metrics product used to monitor workload performance and KPIs using Prometheus for reporting, as well as React, TypeScript and Less for flexible components.
- Identified potential performance issues within enterprise product and led the replacement of Redux and class components with a functional React design system using CSS-in-JS, a stale-while-revalidate HTTP cache invalidation strategy and Storybook; resulted in improved stability and performance.
- Partnered with Customer Support team to establish strategy for proactively identifying and addressing top user issues, which resulted in a 15% decrease in customer support volume.
- Implemented one-click accessibility of Notebook product from URL, which supported new user sign-ups.
- Facilitated stand-up meetings for Front-End Development team with C-suite and stakeholders, communicating key goals, tasks and projects to ensure alignment with corporate expectations.
- Selected to serve in a leadership role, participating on the Hiring Committee by screening and interviewing potential candidates for engineering roles.
- Supported social/racial equity and Diversity, Equity & Inclusiveness (DE&I) efforts by creating and leading bi-monthly workshops on Web Development for BIPOC.
- Leveraged Node.js, Python and Go/Golang languages along with AWS, PostgreSQL, Docker, CircleCI, npm, yarn and Github to complete full-stack development and deployment of various front-end features.

TVGLA, Los Angeles, CA

2018 – 2019

Front-End Developer

Managed design-driven prototyping and development for key client projects across multiple platforms. Led full-stack development across various languages, platforms and frameworks, including Node.js, PHP and Drupal.

- Won an HBO contract by developing a Game of Thrones themed, JavaScript-based mobile Augmented Reality (AR) application using Aframe.js, Three.js, SASS, gulp, webpack and other front-end tools.
- Worked collaboratively with cross-functional technical teams, executives and clients to complete development and optimization of web/mobile application with 8M+ users and 200K+ daily sweepstakes entries.

FUSIONZONE, Los Angeles, CA

2018

Front-End Developer – New Development Team

Integral team member tasked with driving the development of mobile-first websites and features for new and VIP clients. Collaborated with leadership and cross-functional technical resources on the design, build and deployment of new sites, ensuring a user-friendly interface to maintain client satisfaction.

- Launched 20+ sites, completing full-stack development using various tools, including JavaScript, CSS, SQL and PHP.

SNAPCHAT, Los Angeles, CA

2016 – 2017

Product Quality Assurance – Messaging Team

Supported the development of the social media platform by performing quality assurance testing for the Messaging feature to identify potential issues and develop effective resolution plans.

- Created and managed a triage process for 500+ daily reports through IPO to ensure timely and effective resolution.

TECHNICAL SKILLS

Typescript, JavaScript, Node.js, Python, Go/Golang, SQL, PHP, Amazon Web Services (AWS), Docker, CircleCI, Storybook, React Hooks, Redux, Jest, Enzyme, ES Modules, Webpack, Build Tools, HTTP, CSS, CSS-in-JS, SASS, LESS, HTML, Git

EDUCATION

NEW YORK UNIVERSITY, New York, NY
Bachelor of Arts, Economics & Mathematics
